My Visit to Science Park

— by ISHAM VERMA - 7B.

Recently I went to a science park located in Vidyadhar Nagar, Jaipur with my classmates. It was a great experience. My classmates really enjoyed the fascinating things we had never seen before. We understood many things that were related to science, Maths, astronomy, chemistry, biology, physics etc. There were many physical models of difficult concepts which were made easy by using them. Apart from this, our return and depart was really informative too. Our teachers explained us the different topics and concepts there. We also clicked many photographs there. We also enjoyed our lunch. Everyone in my class had bring different food items. There was also a playing area. Our whole class played there, but we got really tired from doing so. At last we had a tour in which we were shown a projection and a complete understanding of our solar system. The most ~~exc~~ exciting part about it, that we were watching it in a dome like structure. The projection lasted long and we learnt many things from it. At the end we were given snacks as refreshments. I really hope that we can get more opportunities like this in the future.
